Tue, Mar 31, 2026 at 9:17 PM

Hi @Priyatam Piyush

We also need to provide drilldowns for each of the other groupings in **Queue Distribution**.
Namely:

- By State
- By Agent
- By Hour
- By Day
- By Month

qry_distby_drilldown.sql supports all of the above.

=====

BY STATE

Since "By State" is new, I updated our drilldown SQL to support passing this parameter. Please find the updated **qry_distby_drilldown.sql** attached.

Example:

- first, state column should now be a link.

START DATE

END DATE

QUEUE

AGENT

DID / PHONE

Jan 01, 2026

Queue Distribution

Call distribution by queue, DID, agent, hour, day, and month

By Queue

By DID

By Agent

By Hour

By Day

By Month

By State

State	Region	Channel	Method	Received	Answered	Unanswered	Abandoned
California	SFL	VOICE	INBOUND	12	12	0	0
Florida	SFL	VOICE	INBOUND	8	1	0	7
Florida-305	SFL	VOICE	INBOUND	4	4	0	0
Florida-408	SFL	VOICE	INBOUND	3	0	0	3
Florida-412	SFL	VOICE	INBOUND	140	103	6	31
Florida-678	SFL	VOICE	INBOUND	2	1	0	1
Florida-786	SFL	VOICE	INBOUND	54	30	7	17
Florida-813	SFL	VOICE	INBOUND	2	0	0	2
TOTAL				225	151	13	61

- second, the text value should be passed as an argument to the JSON parameter in **qry_distby_drilldown.sql**

```
{
  "instance_id": "fc8f1921-2aa3-4cf6-8fc4-ad4b42897030",
  "start_datetime": "2026-01-01 00:00:00.00000",
  "end_datetime": "2026-03-31 23:59:59.99999",
  "sla_threshold": "30",
  "true_abandon_threshold": "30",
  "region": [
    "SFL"
  ],
  "state" : "Florida-412"
}
```

BY AGENT

All you need to do is pass the agent_id associated with the link that the user will select.

START DATE

END DATE
